News headlines of the week

We are proud of these things

Industrial Technology Timber Products & Furniture Technologies.

Industrial Technology students in Year 12 this year have produced an outstanding standard of work in the practical component of their HSC Course. The projects have been produced throughout the year and involved an intense level of design, practical skills as well as the ability to complete work by a set date for external assessment.

Special mention should be made of Jackson Knott's grandfather clock and Ben Janiszewski's cabinet which both displayed skills far beyond those expected of HSC students. Their work was highly commended by the examiners.

The written Examination was also completed recently with students being confident with their efforts and achieving a successful outcome.

All the students should be commended for their dedication, hard work and the mature approach they exhibited towards their projects . Alan Latham.
